

GREYSTAR REDEFINES GREEN WITH EARTH DAY INITIATIVE

Greystar announced that it will be celebrating Earth Day by encouraging residents to reduce their environmental impact one light bulb at a time. To support the initiative, HD Supply Facilities Maintenance is offering Greystar property owners reduced pricing on energy-efficient compact fluorescent light (CFL) bulbs.

Participating communities managed by Greystar will provide residents with complimentary CFL bulbs to reduce energy consumption. One resident per apartment can receive up to five CFL bulbs on a first-come, first-served basis, while supplies last. CFL bulbs will be available at Greystar leasing offices during normal business hours starting Monday, April 16 through Sunday, April 22.

“As part of our commitment to sustainability, Greystar is exploring simple ways for communities to make more environmentally friendly choices,” said DeeAnne McClenahan, Senior Director of Procurement and Sustainability. “Each CFL bulb that replaces a standard incandescent bulb can save more than \$55 in energy costs over its life.”

“Greystar’s progressive Earth Day initiative is a great way to help their residents reduce their utility costs and lessen their environmental footprint,” said Evan Matzen, Sustainability Manager for HD Supply Facilities Maintenance. “We are proud to provide Greystar with support for this and their other year-round sustainability initiatives.”

Earth Day is an opportunity for residents and multifamily property owners to join together to create a greener planet. Earth Day was founded in 1970 and led to the creation of the Environmental Protection Agency and the passage of the Clean Air, Clean Water, and Endangered Species Acts. April 22, which is the official date of Earth Day, is celebrated globally every year.

About Greystar
